AERO-SPORT Information for New Members

Welcome to the AERO-SPORT du Grand Duché de Luxembourg.

AERO-SPORT is a non-profit-making association (a.s.b.l.) and the largest and most active aviation club in Luxembourg. The declared aim of the AERO-SPORT is to allow its members to fly at the most beneficial conditions, and with a maximum of safety. We have more than 600 members and a fleet of 12 aircraft.

Our aircraft are 2 Cessna 172SP (IFR) with Garmin G1000 all glass avionics, 3 Cessna 172, 1 Cessna 182 (IFR), 1 Cessna TR182 (IFR), 4 Piper PA28-161 and a twin-engine Piper PA44 as well as a Mechtronix FNPT II simulator used for procedure trainings.

AERO-SPORT's own Approved Training Organisation (ATO), Luxembourg Flight Training Academy asbl (LFTA), offers flight training and ground courses for the Private Pilot License PPL(A) according to EASA-FCL. Currently, we have 30 instructors available to guide student pilots towards their licence and help licence holders to improve their flying skills.

Moreover, LFTA offers the full range of Flight Crew Licensing Training, including instrument rating courses (IR), multi-engine rating (MEP), as well as training courses for Commercial (CPL) and Air Transport Pilot Licenses (ATPL). For simulator training and check-outs, AERO-SPORT's approved Mechtronix Ascent Turboprop Trainer (FNPT II MCC) is used.

Below, you will find detailed information for new student pilots as well as for already licensed pilots wishing to join the club.

1. General Information

To start with training, a student pilot must be at least 16 years old and have successfully passed a medical check for an "initial medical class 2" certificate (the expense is not included in the quotation below).

Practical flight training and theoretical knowledge course may be done in parallel.

The theoretical knowledge course includes 120 hours of ground school, which will be held up to 3 times a week, in the evening from 19h00 to 21h30 on Monday and Wednesday as well as on every other Friday. These courses are held from October to February. Following the theoretical course, the student pilot will be recommended to the DAC to pass the theoretical examination.

A distance learning theoretical knowledge course that can be started at any time, is also available. Please make your proper choice on the registration template.
